PROJECT

Hospital Appointment Booking System

Description: The appointment booking system is a web application designed to facilitate the scheduling and management of appointments. The system leverages modem web technologies, including Node.js for server-side logic, JavaScript for client-side interactivity, EJS for templating, MongoDB for database management, and Nodemailer for email notifications. This application aims to provide a seamless and user-friendly interface for both clients and administrators to manage appointments

Key Skills: HTML, CSS, JavaScript, Tailwind CSS, Node JS, Java, MongoDB
